

LINK Embrace
Shoulder System

DESIGNED TO EMBRACE YOUR RANGE OF MOTION.

Many years of experience with successful implant systems and fixation concepts as well as the latest material and coating technologies have been taken into account and applied in the design of the LINK Embrace Shoulder System.

Adaptability

Wide Range of Sizes

Streamlined Instruments

Reverse Glenoid Baseplates

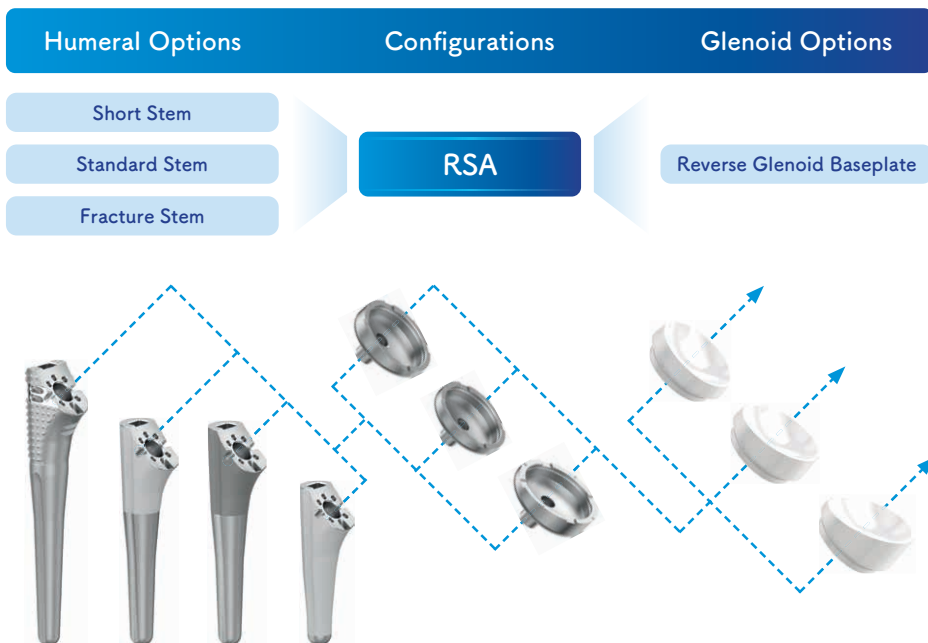

The Reverse Glenoid Baseplates were designed specifically to address various treatment options depending on surgeons' choice.¹

Variety of choices

The LINK Embrace Shoulder System offers diverse fixation options suitable for the majority of patient populations and indications.

A wide range of stems in different configurations allows for cemented and cementless fixation, different types of Reverse Trays and Reverse Inserts offer several options for component alignment in all spatial planes.

Don't fight the change.

Embrace it!

Anatomic Design

Color Coding Instruments

Wide Range of Sizes

Multiple Options of Bone Screws

Material Selection

*Embrace
the change!*
